Restriction to one of the following inventions is required under 35 U.S.C. 121 (insofar as the claims can be understood):

- I. Claims 1, 4;1, and 6;1 drawn to a process of making an overhead infrastructure, classified in class 254, subclass 134.3cl.
- II. Claims 2, 3, 4;2, 4;3, 5, 6;2, and 6;3, drawn to a process of using an overhead infrastructure to do business for optimizing the rent or sale of lines based on estimated demand for the lines utilizing the number and weight of the lines, classified in class 705, subclass 414. (note: language such as "managing conductors", "administrator provides rights for using the cableway for rent or sale", indicates a use of the overhead infrastructure after assembly of the overhead infrastructure).

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and process of using the product. The use as claimed cannot be practiced with a materially different product. The product is merely a plastically deformable coil per se which is not allowable. Since the product is not allowable, restriction is proper between said method of making and method of using.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
